## ABSTRACT

A Web browser is a application that runs on a user mobile or other Internet-capable device through which users can retrieve, view, and interact with Web-based multimedia content such as Webpages, images, or videos. Examples of Web browsers that have been popular since their inception include Netscape Navigator, Microsoft Internet Explorer, Mozilla Firefox, Google Chrome and Safari . Regular browsers are less interactive but our proposed browser can be user friendly, less size, security, simple UI and better Ad Blocking .

A handwritten signature in blue ink, appearing to read "S. Anand".
