## ABSTRACT

Online blood bank and management using php, is an online website which is widely used to maintain the data of the blood donors in emergency. It reduces the risk of the people and helps to find the donor quickly. It is very easy for people to use this website. It is easy for peoples to use this website for registration of the required details. In blood bank management system these are the steps to be filled by the donor name, donor id, donor mobile number, donor address etc.. With the help of the details the hospital management can easily contact the donor. It is safe for the donor because the details will be maintained safely by the hospital management. The main motive of this website is to save the lives in the times of lack of blood. Growing technology changes the needs for the people, to satisfy that we can develop an website called "Online Blood Bank Management using php".
